I don't see how this could be a concern.

If I forwarded to urban gardening experts (Ganga from KSU, Dr ---- whose name I can't recall right now from USDA, Ann Carroll at HQ who knows the tech contacts), I assume they could commentbut would need to send them chemical info as they have not been involved. I guess we can discuss tomorrow.

Subject: Fw: Question (from WVBPH re gardening)

Hi Fran and Jack

Maybe we can discuss this at the regular 9 am Freedom call.

Ex. 5 - Deliberative

Subject: Question

Lora:

I got this question from a state senator and do not have an answer. I thought I would forward it to you and your team to see if there was an answer to this question. Thanks for your help.

1. What suggestions are there for individuals with home gardens? How do these chemicals affect vegetation and are there any dangers to/with home grown foods?
